

DAY 5 - TESTING, ERROR HANDLING, AND BACKEND INTEGRATION

REFINEMENT:

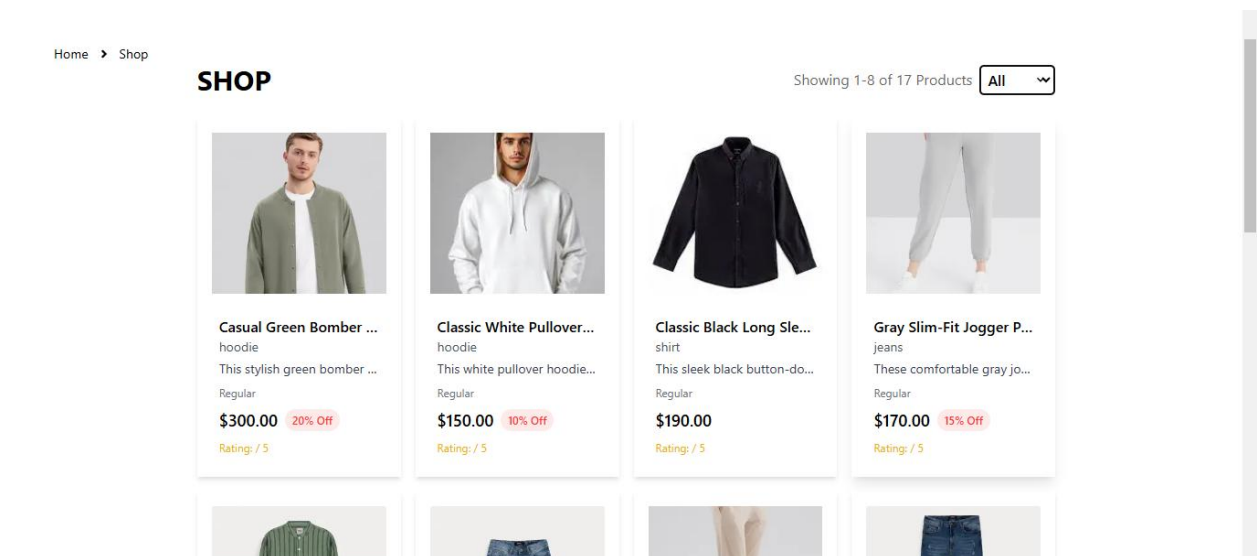

{Trendify}

. Functional Testing:

I have checked the all functions, and they are working perfectly fine.

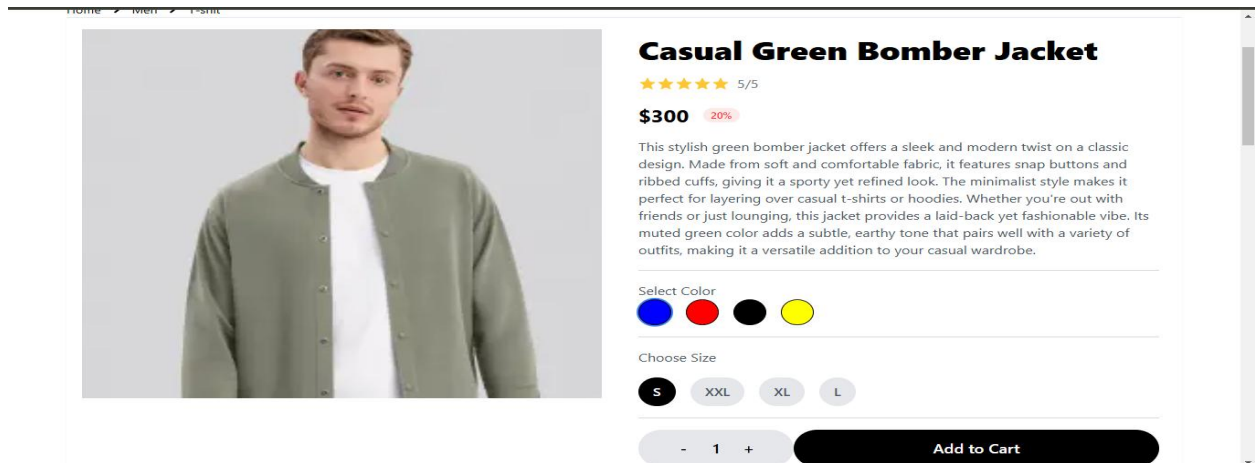

Product Listing:

Is it work all Product listed in Shop page Perfectly:

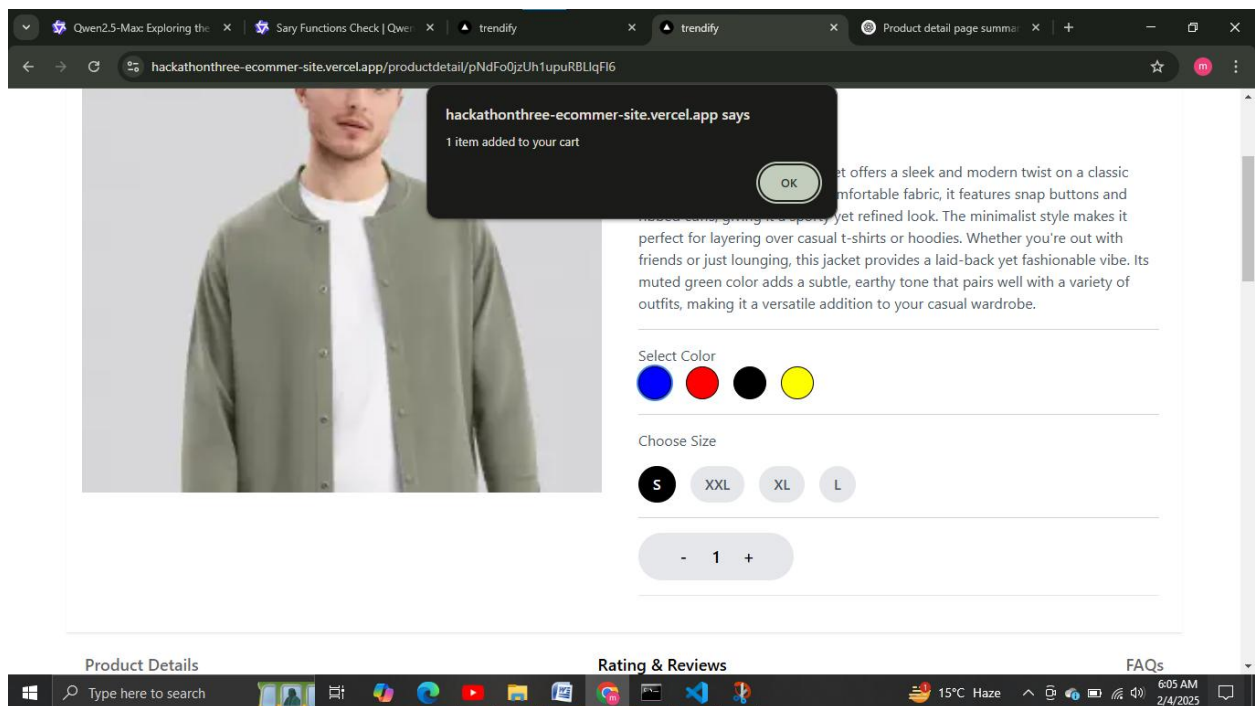

Product Details Page:

The product detail page is a dynamic page that finds and renders a product using its ID, and all the provided functions work properly within it.

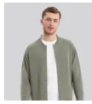

Cart Operations:

The cart operation is working perfectly. A product will be added to the cart from the product details page only if the color and size are selected. Upon adding to the cart, an alert will appear saying **"1 item added to your cart."** As soon as the user clicks **OK**, they will be navigated to the cart page, where the checkout functions also work flawlessly.

Error Handling

There is no error handling here, but the API is working perfectly. All products have been fetched successfully, and there is no **stock** object in my API.
